Title	Business intelligence Strategy and Roadmap
Number of pages	
Focus	In the modern conditions of the dynamic and rapidly changing business environment organizations pursue goals to improve their adaptation capabilities and increase the efficiency of their decision-making process. Due to this organizations implement the Business Intelligence (BI) solutions (reporting, analyzing and forecasting information systems) into their operations. However, the implementation of the BI differs from implementation of a typical IT project due to the fact that business benefits that BI systems provide are intangible and difficult to quantify, companies may face significant problems related to the project planning, cost-benefit analysis, vendor selection, data preparation, employees training and ethical and legal aspects of the implementation.
Keywords	Business Intelligence (BI), vendor, project plan, planning, cost-benefit analysis, employees training, BI justification, IT infrastructure, ethical and legal aspects, BI architecture, business analytics, data mining, OLAP analysis, BI implementation process model, sensitivity analysis, information flow
Tools	SAP ECC, SAP BW, SAP Business Objects, Microsoft Power BI

## Why BI Strategy & Roadmap?

Á  
Á  
Á

Business Intelligence (BI) is a way of exploring data to improve business performance, whether to drive profitability or manage costs. It is not [ ] ^ technology you implement and then put in maintenance mode. Whether you are implementing Business Intelligence for the first time or expanding an existing implementation, it's important to be clear about the goals of your deployment.

You maybe implementing BI system as part of an IT effort or as part of a specific line of business initiative. The goals of these two groups can be quite difference and complex. The goals of the two groups can be quite different . The goals may be driven by the following:

a	Sales Analytics	Improve customer loyalty, manage products prices, increase market share;
b	Supply Chain Analytics	On-time delivery, low freight costs;
c	Finance Analytics	Reduce aging of accounts receivable, reduce budget variance, improve profitability
d	HR Analytics	Reduce employee turnover provide competitive pay

## What will you learn ?

Á

A BI Roadmap describes a proposed path of BI evolution in pursuit of implementation of an information delivery strategy. A BI Roadmap is often the end result of conducting a comprehensive BI program assessment, which qualitatively and quantitatively describes: first the Current State of an existing information delivery environment (“Where are we today”), then is followed by the Future State vision of what the organization would like their information delivery environment to be (“Where do we want to be tomorrow”).

In essence, the BI Roadmap life cycle begins with the Current State assessment, followed by the Future State assessment, and then ends with the Roadmap that describes how the organization plans to proceed from Current State to Future State.

a	Current State	Where are we today ?
b	Future State	Where do we want to be tomorrow ?
c	Current BI Vendors Future BI Vendors	Current BI Vendors & reports Future BI Vendors & reports
d	Roadmap	BI Roadmap lifecycle

## Comparison of Transaction System with Data Warehouses

We can divide IT systems into transactional (OLTP) and analytical (OLAP). In general we can assume that OLTP systems provide source data to data warehouses,

With any BI deployment, there are different groups of users, all with distinct information and functional needs. The ways they want to access SAP Business Objects will also vary.

1. Job Level
2. Job Function Level
3. Degree of Analytics
4. ERP or Source System Use
5. Level of Data Literacy
6. Level of Spreadsheet Usage
7. Amount of Travel
8. Implementation Phase
9. Internal Versus External Users
10. Other Who Affect Implementation Efforts
  - 10.1. Influencers
  - 10.2. Deciders
  - 10.3. Program Manager
  - 10.4. Project Manager
  - 10.5. Security administrator
  - 10.6. Universe designer
  - 10.7. Report author / pilot user
  - 10.8. Information consumers
  - 10.9. SAP BO experts
  - 10.10. Data Experts
  - 10.11. Database administrator
  - 10.12. Administrator or architect
  - 10.13. Trainer
  - 10.14. Communication / Marketing specialist
